

Erratum: “Examining the Relationship between Climate Change and Vibriosis in the United States: Projected Health and Economic Impacts for the 21st Century”

Megan Sheahan, Caitlin A. Gould, James E. Neumann, Patrick L. Kinney, Sandra Hoffmann, Charles Fant, Xinyue Wang, and Michael Kolian 

Environ Health Perspect. 130(8): 087007 (2022), <https://doi.org/10.1289/EHP9999a>

The caption of Figure 1 contained extraneous text. These errors did not affect the figure. The corrected Figure caption reads:

Figure 1. Trends identified in vibriosis cases in the United States reported to COVIS (2007–2018) by species. This figure does not present the number of total cases, which would account for underreporting and misdiagnosis. See Table S14 for the corresponding values presented in this figure. Note: ALG, *V. alginolyticus*; COVIS, Cholera and Other Vibrio Illness Surveillance (system); OTHER, other non *V. cholerae* *Vibrio* species, including *V. cholerae* non-O1 and non-O139, *V. cincinnatiensis*, *V. damsela*, *V. fluvialis*, *V. furnissii*, *V. hollisae*, *V. metschnikovii*, *V. mimicus*, *V. species not identified*, multiple *V. species*, and other; PAR, *V. parahaemolyticus*; VUL, *V. vulnificus*.
